(54) Title: PEPTIDE COMPLEXES CONTAINING PHOSPHOLIPASE D

(57) Abstract: The present invention provides peptide complexes comprising phospholipase D and one or more phospholipase D-interacting peptides. The peptide complexes are useful in screening assays for identifying compounds effective in modulating the peptide complexes and in treating and/or preventing diseases associated with phospholipase D and its interacting partners. In addition, methods for screening modulators of the peptide complexes or interacting members thereof are provided.
